I'm healing, but I'm still hurting. The break in my nose and is causing headaches really bad headaches.

These guys continued to harass me all weekend.

How long for a broken nose to heal? Do I need to see someone about this? I might end up at the ER if it the pain gets worse.

This is the most painful injury and recovery I've ever experienced. I just wanted to update you.

Thank you,

Justin

Hey Justin, I am sorry to hear this. I know this is hard for a lot of reasons and very painful physically.

As we discussed in our video visit last week, it is pertinent that you get evaluated by an ENT and/or a maxillofacial or plastic surgeon to address these fractures.

You can schedule a video visit follow up with me this week as well to check in
